

LAWN Meeting Guidelines

Dec. 17, 2021

1. We feel the travelogues are fun and can be interesting so we will continue to sponsor them. We would like presenters to follow these parameters when doing one. Limit your presentation to your 30 best images. Leave time for discussion and questions around your images. Limit the total time of the presentation to 30 minutes.
2. We will be happy to have tech tips that members request that relate to LAWN when not one the Circles of Learning group wishes to do. Because tech tips can be technical and may require a certain amount of discussion we request that these also are limited to 30 minutes and the presenter should consider enough time for lots of discussion. We may have either a travelogue or tech tip in each meeting (if we have volunteers to give them) but not both at the same meeting.
3. We will have a photo share each meeting but would like to limit it to 4 or less images per person. The individual should mention the photo equipment and settings used in the picture and discuss their thoughts when taking the picture such as composition, lighting, subject matter, etc. Questions and comments from members are encouraged. If a significant amount of post processing was done perhaps a before and after image would be nice. We actually feel the best Tech Tip you will receive can be embedded in these discussions and it is our hope that this is the most educational and rewarding part of the LAWN experience.
4. For those individuals presenting a Travelogue or Tech Tip that do not regularly share their Zoom screens we would like you to have a trial run with your picture display, done with someone in the group that is experienced in Zoom screen sharing before the meeting.
